WATSON LEWIS-RODRIGUEZ

(402) 237-1026 | wlewisrodriguez@gmail.com | wlewisrodriguez.medium.com | github.com/5eh

Full stack developer with proficiency in blockchain development. Capable of designing MVPs quickly using the most up to date technology. Previously played with ZK Encryption, NFT 3D Printing, and built custom neural networks as a teenager.

EXPERIENCE

Arthur Labs – Austin TX – Founder & Developer
Quantum EVM – Remote – Project Developer
UniFires – Remote – Website Developer
MoniSwap – Remote – Frontend Developer & Advisor
Pigeon DAO – Omaha NE– Cofounder & Developer

CERTIFICATIONS + DEGREES

React Tutorials and Projects Course – AUG, 2022

Motion Design with Figma: Animations & UX/UI – APR 2024

JavaScript: The Advanced Concepts – APR 2024

Three.js Bootcamp – APR 2024

Certificate of Participation - Hackathon - PKO Bank Polski – FEB 2024

Computer Forensics Fundamentals – SEP 2024

Odoo 16/17 Technical Course – SEP 2024

Associates of Business Management Degree – MAY 2022

BTEC Information Technology Degree – SEP 2019

COMMERCIAL TOOLS

FRAMEWORKS – Next.js, Svelte

FRONTEND – JavaScript, TypeScript, React, Vite, Vue

BACKEND – Rust, Python, Neo4J, GraphDB, Supabase, MongoDB, Solidity, cameLIGO, SmartPy, Michelson

BLOCKCHAINS – Ethereum (Optimism, Whitechain, Scroll, Binance, Quantum EVM), Polkadot, Vara

NOTES – HackMD, ObsidianMD, LaTeX

DESIGN – Figma, Photoshop, Blender, Tailwind UI Components

MVP – Scaffold-Eth-2, Tailwind UI Boilerplate

PERSONAL TOOLS

Arthur Labs – DEAN System – Build streamlined two-sided marketplaces through a configuration based system. (*in progress, nearly completed*)

Arthur Labs – QUINN System – Streamline marketing content for businesses using various social media platforms. (*in progress*)

Odoo ERP Integration – Onboard ERP business data into GraphDB or other locally hosted databases for automated data retrieval and updating.

Smart Contracts – Can provide boilerplates for factory, proxy or isolated smart contracts, especially related to enterprise or commerce usage.

HACKATHONS

Binance – Remote – Made commerce marketplace boilerplate compatible across 250+ chains.

IstanHack – Istanbul, Turkey – Designed and developed a tailored bazaar for Istanbul to transact and trade with ETH.

HENRY – Remote – Improved contract standards, and built a commerce marketplace boilerplate.

Easy A Consensus – Austin TX – Decentralized 3D Print shop using Robonomics blockchain, artificial intelligence, and NFTs.

Degen Hack – Remote – Built smart contract standards for real world commerce and service transactions.

TeensInAI – Remote – Built and trained custom LLMs for enterprise medical use.
